

Get rid of the annoying updates from Adobe, Java, etc. I will list - and update - here all cool tricks to disable the update functions.

Flashplayer

Create a file with the name mms.cfg that contents **AutoUpdateDisable=yes**

copy mms.cfg to C: [\WINDOWS\System32\Macromed\Flash](#) (For 32 bits Windows)

copy mms.cfg to [C:\Windows\Macromed\Flash\SysWOW64](#) (For 64 bits Windows)

Shockwave player

Manual see: http://kb2.adobe.com/cps/166/tn_16683.html

Via registry HKEY_LOCAL_MACHINE\SOFTWARE\Adobe\Shockwave 11\AutoUpdate

Name: (Default)

Type: REG_SZ

Date: n

JAVA

Via registry HKEY_LOCAL_MACHINE\SOFTWARE\JavaSoft\Java

UpdatePolicy\EnableJavaUpdate

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\JavaSoft\Java

UpdatePolicy\EnableJavaUpdate

I'am not sure this work.

Nokia PC-Suite

Via registry HKEY_LOCAL_MACHINE\SOFTWARE\Nokia\ConfServerApp

Name: WebUpdateEnabled

Type: REG_SZ

Date: 0

AdobeReader X

Via registry HKEY_LOCAL_MACHINE\SOFTWARE\Adobe\Adobe ARM1.0\ARM

Name: iCheck

Type: Dword

Date: 0
