

A happy, wealthy and healthy 2013 for everyone who respects the freedom of speech and [self-determination](#)

.

One of my users mentioned about missing national holidays in his Outlook Calendar. I followed the [procedure](#) to add these days to my calendar and saw that the holidays were added. The difference, I use Outlook 2007, the user Outlook 2003. For Outlook 2007, first install [hotfix kb2687329](#)

My solution is to pick the holidays out of the OUTLOOK.HOL file from my Office 2007 installation and put these days in the OUTLOOK.HOL file on the Office 2003 machine. This solution worked.

On Windows 7/Office 2007 the file is located in:
C:\Program Files (x86)\Microsoft Office\Office12\1043

On Windows XP/Office 2003 the file is located in:
C:\Program Files\Microsoft Office\Office11\1043

The office installation is in Dutch, so probably your OUTLOOK.HOL is on another location

Download [here](#) the OUTLOOK.HOL file I used.

Update 6-5-2013: Because of the abdication of Queen Beatrix and our new King Willem Alexander I made a new outlook.hol (With kingdays / Koningsdagen). Special thanks goes to Reinier van Alphen for the notice.
