

When Inventor 2012 and Inventor 2010 are installed on a machine the Add-ins (For example the Vault Client) aren't working anymore in one of the versions.

I've found a workaround.

Make a change in the user registry

Make Inventor 2010 working

```
HKEY_USERS{sid of the  
user}\Software\Classes\CLSID\{4C80573A-9150-11d2-B772-0060B0F159EF}\InprocServer32  
(Default) C:\Program Files\Autodesk\Inventor 2010\Bin\RxAppDocView.dll  
was  
(Default) C:\Program Files\Autodesk\Inventor 2012\Bin\RxAppDocView.dll
```

Make Inventor 2012 working

```
HKEY_USERS{sid of the  
user}\Software\Classes\CLSID\{4C80573A-9150-11d2-B772-0060B0F159EF}\InprocServer32  
(Default) C:\Program Files\Autodesk\Inventor 2012\Bin\RxAppDocView.dll  
was  
(Default) C:\Program Files\Autodesk\Inventor 2010\Bin\RxAppDocView.dll
```
